

EXCELLENT DECEMBER QUARTER SEES DACIAN DECLARE COMMERCIAL PRODUCTION AT MT MORGANS

- ***Dacian meets its target of achieving Commercial Production in December at the Mt Morgans Gold Operation (MMGO) in WA***
- ***Outstanding December quarter performance, with gold production at 37,930oz, up 30% from the September quarter***
- ***Progressively increasing production levels expected through remainder of FY19***
- ***Cash and gold-on-hand increased to A\$85.6 million at December 31, 2018***

Dacian Gold Ltd (“**Dacian Gold**” or “**the Company**”) (ASX: DCN) is pleased to announce that it has declared Commercial Production at its 100%-owned Mt Morgans Gold Operation (“**MMGO**”) near Laverton in Western Australia. The declaration, which was made on January 1, 2019, followed combined mining rates across the operation achieving Feasibility Study design levels during the December quarter.

Dacian is also pleased to report that gold production for the December quarter totalled 37,930oz, a significant increase on the prior quarter and in line with the Company’s guidance of progressively increasing production through FY19. Gold poured for the December quarter totalled 38,479oz.

Underground mining is now underway across all three declines at Westralia (Beresford South, Beresford North and Allanson). At the Jupiter open pit, higher-grade ore in the Cornwall Shear Zone is anticipated to be mined later in the March quarter.

This combined progress across the operation will support continued operational momentum and underpin further quarterly increases in production through the remainder of FY19.

Dacian Gold Executive Chairman and CEO Rohan Williams said the declaration of Commercial Production was another example of the Company meeting its development and production targets.

“We are pleased to have achieved this important milestone – exactly when we said we would,” he said. “It was an outstanding quarter, with production increasing 30 per cent from the September quarter. Again, this ramp-up is in line with our stated objective of materially increasing quarterly production levels over the course of FY2019.”

At the end of the December quarter, Dacian had \$85.6 million in cash and bullion (versus \$82.1 million at the end of the September quarter).

For and on behalf of the Board

Rohan Williams
Executive Chairman & CEO

ABOUT DACIAN GOLD LIMITED

Dacian Gold Limited (ASX: DCN) has cemented its position as a significant new mid-tier Australian gold producer with the declaration of Commercial Production at its +200,000ozpa, 100%-owned Mt Morgans Gold Operation (MMGO), located near Laverton in Western Australia, on 1 January 2019.

With an initial Ore Reserve of 1.4Moz, a Mineral Resource of 3.5Moz (including Ore Reserves) and highly prospective exploration tenure, Mt Morgans is the largest new gold mine to come on stream in Australia in the past six years.

Combining a targeted AISC of approximately A\$1,000/oz at MMGO, a focus on expanding operating margins and generating free cash flow will further strengthen the Company's balance sheet while pursuing numerous organic growth options at the MMGO.

The Board comprises Rohan Williams as Executive Chairman & CEO; and Robert Reynolds, Barry Patterson and Ian Cochrane as non-executive directors.

Competent Person Statement

In relation to Mineral Resources and Ore Reserves, the Company confirms that all material assumptions and technical parameters that underpin the relevant market announcement continue to apply and have not materially changed.

Exploration

The information in this report that relates to Exploration Results is based on information compiled by Mr Rohan Williams who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Williams holds shares and options in, and is a director and full time employee of, Dacian Gold Ltd. Mr Williams has sufficient experience which is relevant to the style of mineralisation under consideration to qualify as a Competent Person as defined in the 2012 edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.” Mr Williams consents to the inclusion in the report of the matters based on the information compiled by him, in the form and context in which it appears.

Mineral Resources

The information in this report that relates to Mineral Resources for Westralia, Jupiter, Cameron Well, Ramornie, Mine and Low Grade Stockpiles (See ASX release 6 August 2018), and Transvaal (see ASX release 16 September 2015) is based on information compiled by Mr Shaun Searle who is a Member of Australian Institute of Geoscientists and a full-time employee of Ashmore Advisory. Mr Searle has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Searle consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to Mineral Resources for Craic and King Street is based on information compiled by Mr Rohan Williams, who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Williams holds shares and options in, and is a director and full time employee of, Dacian Gold Ltd. Mr Williams has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Williams consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Ore Reserves

The information in this report that relates to Ore Reserves for the Westralia Mining Area is based on information compiled or reviewed by Mr James Howard. Mr Howard has confirmed that he has read and understood the requirements of the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012 Edition). Mr Howard is a Competent Person as defined by the JORC Code 2012 Edition, having more than five years’

experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity for which they are accepting responsibility. Mr Howard is a Member of the Australasian Institute of Mining and Metallurgy and a full time employee of Dacian Gold Limited and consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to Ore Reserves for the Transvaal Mining Area (see ASX announcement 21 November 2016) is based on information compiled or reviewed by Mr Matthew Keenan and Mr Shane McLeay. Messrs. Keenan and McLeay have confirmed that they have read and understood the requirements of the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012 Edition). They are Competent Persons as defined by the JORC Code 2012 Edition, having more than five years' experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity for which they are accepting responsibility. Messrs. Keenan and McLeay are both a Member of the Australasian Institute of Mining and Metallurgy and full time employees of Entech Pty Ltd and consent to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to Ore Reserves for the Jupiter Mining Area and Cameron Well Area is based on information compiled or reviewed by Mr Mathew Lovelock. Mr Lovelock has confirmed that he has read and understood the requirements of the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012 Edition). He is a Competent Person as defined by the JORC Code 2012 Edition, having more than five years' experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity for which he is accepting responsibility. Mr Lovelock is a member of The Australasian Institute of Mining and Metallurgy and a full-time employee of Dacian Gold Limited and consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Where the Company refers to the Mineral Resources and Ore Reserves in this report (referencing previous releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource estimate and Ore Reserve estimate with that announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons findings are presented have not materially changed from the original announcement.

All information relating to Mineral Resources and Ore Reserves (other than the King Street and Craic) were prepared and disclosed under the JORC Code 2012. The JORC Code 2004 King Street and Craic Mineral Resource has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last updated.
